The French advance into Lorraine continues unchecked. Th waders are 30 to 40 miles across the line.

Such brief dispatches from the Continent as the censors ermits the London press to print today indicate that the allies rmies of England, France and Belgium are on the eve of the firs great battle with the German invaders, if, indeed, the battle in force is not already begun.

The English Government announced today for the first tim the sending of an army to Belgium and the official statement tol that the movement had been completed. This sets the scene, far as the allies are concerned. Already the Belgium Governme has deserted Brussels for Antwerp.

By ASSOCIATED PRESS PARIS, Aug. 20, 3:02 p. m.—An official announcement gives this message to the War Department from Gen. Joffre, French Commander-in-Chief:

### Press Kept Perfect Silence While **Army Was Crossing Channel**

The most important revelation of the day has been that of the landing of a British expeditionary army on the shores of France. Everybody in England has known for two weeks that a large army was crossing the channel. The troops had been asnbled at different bases, one of the largest contingents embarkng at Dublin, Ireland. Many other regiments sailed from Liverol, while still others took ship at East Bourne, Southampton and other ports along the coast of the English Channel.

The great canvas camps at the military stations in England were struck only when it was known definitely that the flotilla of transports conveying the troops had finished the over-sea movement under the escort of strong squadrons of warships.

The transportation of the soldiers lasted several days, and during that time not a mention of the expedition was permitted to the newspapers here. Even now the strength of the expedition, the names of the regiments composing the contingents and the ports where they landed are not allowed to be made public.

It is known, however, that a large proportion of the best troops of the British regular army are now on continental soil. The reeption of the British soldiers everywhere in France was enthusiastic. The officers and men of the two armies fraternized warmly.

The official news bureau says not a single casualty occurred during the embarkation, transportation and debarkation of the men and stores of the British expeditionary force and everything was carried through with the greatest precision.

When the death of Gen. Grierson from heart failure was an-Lounced yesterday as having occurred "while traveling on a train," everybody in official circles understood that the General had been stricken in France.

The official news bureau announces that Gen. Sir Horace mith-Dorrien has been appointed to command one of the army orps of the expeditionary force in succession to Gen. Grierson.

### Holland Barricades Her Frontier

haily Telegraph reports that Holland is taking most elaborate cautions along her frontier to enforce her neutrality.

Detachments of cavalry constantly patrol the frontier and large forces of infantry guard the roads, which are blocked at frequent intervals with barbed wire entanglements and barricades. The roads are the key to the situation, as artillery cannot be taken across the open fields, which are marsh lands.

In towns near the frontier large bodies of troops are congre ted and the possible lines of invasion are commanded by powerforts, which are strong and modern. Arrangements are comste for flooding the country of the frontier at a moment's notice.

In the neighborhood of the forts, houses, trees and crops have een leveled to make it impossible for an army to approach it nder cover. Several whole orchards have been cut down. The rivers are protected by armed barges.

Emergency Measure Will Be Put Before House to Assist the Registry Act.

WASHINGTON, Aug. 18.-Emergency egislation to create a Government bueau which would insure steamers transorting American products abroad during war in Europe was ready for presentation in the House today. It would supplement the new shipping bill passed by Congress authorizing admittance of foreign-built steamers to American reg-istry and the protection of the United

States flag.

The measure, which has the approval of the administration, was one of the war emergency measures proposed at the recent Washington conference of business men. Secretary McAdoo and other Cabinet members said that un-less war risk insurance were provided, comparatively few steamers would take advantage of the new shipping law in the immediate future. Premier, Addressing Merchants, Tells of Mikado's Intentions, Saying no Third Party Need Have Uneasiness Regarding Safety of Her Possessions.

By Associated Press.

TOKIO, Aug. 18.-Count Okuma, the Japanese Premier, today, in addressing a gathering of business men from various parts of Japan, reiterated the statements he had made to the members of Parliament, merchants and industrial men of Tokio early in the morning. The Premier said it was the intention of Japan to eliminate from China the root of German influence.

"Japan's warlike operations," he added, "will not extend beyond the limits necessary for the attainment of the object of the defense of her own legitimate interests.

'The Imperial Government will take no such action as could give to a third party any cause for anxiety or uneasiness regarding the safety of their territories or possessions."

HE world has 53 independent governments or nations ruling themselves. Of these eight are at war. Their population is 837,417,000. The 45 nations at peace have a population of 682,733,000. Thus the world contains today 154,684,000 more persons involved in war than living at peace. The countries at war and their populations follow:

British Empire,	435,000,000
Russian Empire	166,250,000
France and Colonies	98,850,000
Germany and Colonies	79,045,000

"Pending the arrival of sufficient money to relieve your wants lease accept this 55 note from me." Mrs. Busch did so gladly. After considerable cabling Mr. Harvey managed to have \$5000 deposited to the credit of Mrs. Busch with a London banking institution. In her anxiety to catch an early steamer for America, Mrs. Busch offered to pay a premium of £1000 (\$5000) for suitable cabin accommodations. She was informed by the Relief Committee would be obtained for her and her party without the payment of a premium. After some negotiating, Mrs. Busch, her daughter and three grandchildren were booked on the St. Louis of the American line, sched uled to sail Aug. 15. The servants were provided with quarters on a steamer sailing Aug. 22.

He Tells Convention T. R.'s Personality Was Only Real Substance of Third Party.

SARATOGA, N. Y., Aug. 18.-United SARATOGA, N. Y., Aug. 18.—United States Senator Elihu Root, temporary chairman, in addressing the Republican State convention, which opened here today, declared that the Democratic party, in charge of the national Government a year and a half, with a program "by which they proposed to set free every American from the incubus of too great success by others, to reduce the cost of living, and to give new life and program." of living, and to give new life and pros-perity to American production and commerce." had failed.

The convention is without power to nominate candidates for office. Under the new primary law the voters will do that at an election on Sept. 28. "In this controversy with the Demo-oratic party the Republican party stands alone," said Root. "The threat of a third party, which alarmed so many Republicans two years ago and still vexed us one year ago, has practically disappeared. It is now plain that it never had any real substance apart from the powerful personality of Mr. Roosevelt." Root asserted that the new tariff law was hostile to American industry; that the delay in putting the new currency law into effect was having a bad effect on the country, and that the in-come tax law drew virtually the entire tax from the residents of a few wealthy states, to be expended by men represtates, to be expended by men repre-senting other parts of the country. The belief was expressed by Root that ex-cept for the higher offices, the primary would be a failure, because in the cit-ies the vote would be concentrated on a few candidates, while in the country each voter would ballot as he pleased, esulting in a widely scattered vote.

The chief duty of today's conven-tion is to adopt a State platform. At the primary the Republicans will select also candidates for United States Senator, Judge of the Court of Appeals, tary of State, Comptroller, Attorney eneral, State Treasurer, State Engineer

### What Thin Folks Should Do to Gain Weight

Physician's Advice for Thin, Undeveloped Men and Women

Thousands of people suffer from excessive thinness, weak nerves and feeble stomachs, who, having tried advertised fleshmakers, food-fads, physicai culture stunts and rub-on creams, resign themselves to life-long skinniness and think nothing will make them fat. Yet their case is not hopeless. A recently discovered regenerative force makes fat grow after years of thinness, and is also unqualed for repairing the waste of sick-ness or faulty digestion and for strengthening the nerves. This remarkable discovery is called Sargol. Six strengthgiving, fat-producing elements of accovery is called Sargol. Six strengthgiving, fat-producing elements of accovery is called Sargol. Six strengthgiving, fat-producing elements of accovery is called supplements of accovery is called supplement people enrywhers, and used by prominent people enrywhers, and efficient.

and efficient.

A month's systematic use of Sargol should produce flesh and strength by correcting faults of digestion and by supplying highly concentrated fats to the blood. Increased nourishment is obtained from the food eaten, and the additional fats that thin people need are provided. Judgs & Dolph, Welpert Drug Co., Raboteau, Wolff-Wilson Co., Johnson Bros. and other leading druggists supply Sargol and say there is a large demand for it.

While this new preparation has given splendid results as a nerve tonic and vitalizer, it should not be used by nervour people unless they wish to gain at least ten pounds of flesh.—ADV.

'Man Who Put Waterway Where It Is," Describes Event He Waited 30 Years For.

VINDICATES DE LESSEPS

Day One of Glory Both for Genius of French and Enterprise of America, He Says.

NEW YORK, Aug. 18.—Philippe Bu-nau-Varilla, who persuaded the New French Co. to accept the offer of the merican Government for the Panama Canal franchises and property, and who later, as a representative of the new Republic of Panama, concluded with the State Department the treaty by which America gained title to the Canal zone, in a letter to the New York Sun, dated Colon, Aug. 4, and printed on Aug. 14. describes his emotions on the day when he passed from ocean to ocean on the first sea-going vessel to pass through

Bunau-Varilla, who is referred to as the "Napoleon who came out of the blue sky and put the canal where it is," declares the completion of the canal is a vindication of the project of Ferdinand de Lesseps and the ideas of the rench engineers. His letter says:

"Yesterday was a day of glory!
"I have salled across the continu divide on the first ocean steamer, the Cristobal, which crossed the Isthmus of Panama from the waters of the At-

lantic to the waters of the Pacific.
"It was not the inaugural trip, which is to take place on the 15th, and for that reason the ship did not go through the channel from Balboa harbor to the

deep water of the Pacific.
"But for the engineer, if not for the authorities and for the public, it was indeed the ringing of the bell which an-nounced that the dream of ages had become a fact. And this bell has rung in the discovery of the Pacific!

Day of Glory for America.
"It was a day of glory also for the American nation which generously gives this great waterway to the world without any special privilege for herself or her citizens and without any mercenary

"It was a day of glory for the great engineer, Col. Goethals, who carried to successful issue the saupendous enter-

"It was a day of glory also for the Genius of the French nation, which first attacked the great task, which discovered all the technical solutions of a roblem hitherto considered as impossible of realization.

"In spite of the yellow fever, in spite of all the obstacles then in the way, accumulated by Nature and Man, it would have been easy for the French to open their canal in 1891 had not the money been wanting in 1888. If the anal had been in the hands of a Gor roment with unlimited financial reprivate corporation, the credit of which became extinct in 1885, the Panar.a Canal would have been a fact 22 years

"Yesterday was therefore a day of glory for the French Genius because it was the day of the vindication of the aim for which it has so long and so stubbornly fought. It was a day of glory for Ferdinand de Lesseps and for his noble and generous son, Charles de Lesseps, who was the real head of the old company and who can also witness the long-hoped-for day of vis-

tory.
"I had yesterday the supreme joy of seeing this gierious vindication when months only separate me from the thir-tieth anniversary of my departure from France for the service of this great

"But with this supreme joy was mixed vesterday another sentiment.
"As an echo to the cheers saluting the victory of Man over the American Cor-dillera, I thought I heard the distant rattle of the French mitrailleuses defending the holy soil of the Fatherland

against the German aggressors. On the same day when was ended the .\$85 On the same day when was ended the great war initiated by the French genius against Nature for the benefit of mankind, another great war was begun, the war against the intolerable German military arrogance and autocracy.

"And the day that war began I was not in France to do my duty! I was n Panama.

"Since the beginning of my official nection with the Panama Canal it has caused me an unceasing series of moral hardships, sufferings and trials. "Never was the trial so cruel, never was the tribute paid by me to the great

enterprise so costly, as on the very day of the final triumph. "On that day, which I have been awalting for 30 years, I was separated by 5000 miles from my place of duty in France. I have been expecting for 44 years to fulfill that duty, and the service of the Panama Canal has prevented me from fulfilling it on the day of call.

"What a tragic coincidence, but also what a symbol of hope! "What as symbol of hope!
"What an auspicious and happy fact, the beginning of that war for the vincication of the dignity and power of France on the very day her Genius receives the most complete vindication thanks to the magnificent performance of her historical friend, the United States of America

States of America.
"On my return to Panama, after pass ing through the Canal, my grief was alleviated by a cablegram: My son and my son-in-law gone to the front! If I am not there to take my share of the peril, they will do both their duty and mine, while I am hastening to their side. "Yes, indeed, it was a day of glory."

In accordance with its high ideals as a Public Service Institution, & as an economic factor in the community this store will not advance the prices on any goods the price of which is affected by the European wars, so long as our present stocks hold out.

Until the last piece of French china or the last yard of German linen is sold we will maintain the old prices.

### Four-Fifths of Our Merchandise is of American Manufacture

-probably even a little more, but possibly a fifth of the goods we use is of foreign origin. It is this store's purpose to expend its best efforts to provide the fashions & fabrics of the Old World to all who may wish them, & it is our purpose to maintain the old prices on imported goods we have on hand, though importers & jobbers have already made sharp advances.

If the war continues some time American ingenuity will provide for the things we now look to Europe for & this store's buying organization will be constantly on the alert to conserve our patrons' interest.

Immigrants as Assets.

To the Editor of the Post-Dispatch: In answer to your article in last night's Post-Dispatch, "Immigrant Assets," I would like to ex-press my sentiments.

Perhaps it may be true that these unskilled im-

wise shipping trust in the Senate. The conference report including coastwise trade was relected by the Senate.

Nothing short of a great emergency could free merica from the hampering restriction placed on American shipping enterprise by privileged business. Under the emergency we shall begin the building of an American merchant marine and eventually all restriction of freedom of action may go.

Meanwhile, pending the organizing of the merthant marine, Congress should give the administration freedom of action in co-operating with ousiness interests to move American products at once. All the resources of the navy should be utilized for this purpose.

The Post-Dispatch repeats with urgent emphasis our suggestion that the Government use all of its naval transport facilities and bring sufficient naval auxiliaries to meet the immediate emergency. Authorizing private capital to act under enlarged powers is a step in the right direction for the future, but it does not assure a supply of ships for the pressing needs of the farmers, manufacturers and merchants. It does not lift the blockade on American products which is putting the railroads out of the meantime thousands of planters are depenbusiness and is creating a menacing business dent on their cotton and must sell their crop.

If these ships go or attempt to go into foreign ports and are taken and destroyed or confiscated who would pay the bills? The Treasury of the United States.

Of course, ships would go under such circumstances. I have heard it said that an American company might be organized which would purchase ships and the Government guarantee the bonds with which to buy them. Suppose we did that, what is the difference

in effect between the Government buying the ships and paying for them in cash and underwriting the bonds of the private corporation that would buy them and own them, and the Government have a lien upon the ships them-

The crisis in cotton, the immediate cause of anxious conferences of representative Southern ers at Washington, increases regret that the benefits of the Federal Reserve system have een so long delayed through factious obstruc-

Why the early effect of the war on cott markets is more to be feared than the effect on the market for other farm products become very apparent when the distribution of the great American staple is known. Of a 14,200,000-bale cotton crop in our Southern states, only about 5.500,000 bales is consumed at home. The remainder, about 8,700,000 bales, is sold abroad. Of this amount a trifle less than 7,000,000 bales is sold in six European countries, five of which are now engaged in the struggle-England, Germany, Russia, France, Austria-Hungary and Italy. England alone takes 3,300,000 bales, and Germany 1,250,000 bales. Italy, not yet involved in the war, takes 550,000 bales. Four countries of continental Europe with which communication will be difficult if not impossible, take 8,050,000 bales.

David Clark of Charlotte, N. C., an authority on the textile industry, sees a great opportunity for American cotton mills. But how many months will it be before the interests that own the mills appreciate the magnitude of the opportunity and make the preparations that will increase the domestic consumption of raw cot-

### AERIAL MURDERERS.

Geoffrey Young, in an interesting description of a trip from Brussels to Namur, as Post-Dispatch correspondent, tells, in Monday's Post-Dispatch, about watching an aviator who flew over Namur and was supposed to be a Belgian. Half an hour later, the correspondent saw an old civilian brought in horribly wounded. Both his legs had been shattered and his head terribly injured by the explosion in his street of dynamite hand grenade, flung down by the aviator who had been thought to be a friend. This is but a repetition of many incidents recorted, in which aviators have committed coldblooded murder by throwing bombs down among unresisting noncombatants. If the present war is not to become a carnival of barbarity, these serial murderers should be promptly punished as they deserve. Their crime is more than usually cowardly, and wholly indefensible.

as funeral directors, cheer up? Why should they make outward profession of sharing in the mourning when that, as everybody concerned must know, is too much to expect of human nature? Funeral direction is a business and there is no use in disguising that fact. But conducting a funeral is also a social service, and we do no advise the undertaker to go to the other extreme and practice levity. Let him be sober and sym pathetic. That is all we have a right to expect except, perhaps, that he reduce his bill a triffe If the mourners are to do all the mourning they abould not be expected to pay for that part of which the funeral director and his men are

### PAY FOR PRISONERS OF WAR.

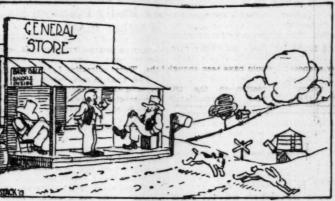

Belgium has introduced a new feature to distinguish the wars of civilization from those of barbarism. Instead of keeping its prisoners of war in idleness and close confinement, that result in physical weakness and general demoralization, it will permit them to be employed in loss of three Austrian ironclads without naming gainful occupations, chiefly in the fields to replace husbandmen called to the ranks in defense of Belgium's independence. It will even provide a small wage for those who take advantage of the opportunity. It will have to be very small if it does not equal the soldier's pay received The Russian lays aside his knout, from their own Government.

This humane idea, voluntarily put into effect is at least equal in merit to some of those that have been a subject of formal covenant in Geneva and other international conferences How many lives might it not have saved had it been in effect in our Civil War? Andersonville prisoners, by raising their own food crops, might have lessened the burdens of the struggling Contederacy, while the healthful employment would have greatly reduced the appalling prison death

MR. ANTWINE ON WHAT WILL BECOME OF IT ALL. ANTWINE got through all the war news a little before and became analytical.

"It is not easy to make out just what is going on in Europe war news is to fill in the intervals between actual happenings with conhave discarded the conventional high hat, frock jectures of probably what will happen. If I recall my history the interval between actual battles in our Civil War averaged about three months, and we can't expect Europe to do much better than that. Before battle is fought the commanders on both sides must have one another just where they want him, and that takes time, too. Great Generals are a little fastidious about this, and they sometimes maneuver for months before they get the other fellow just where they want him. The outcome may be inconsequental to the reader, but it makes a great deal of difference to the general. One must enjoy browsing around in the advertisements once in a while when war news is scarce.

"In the absence of anything very startling this morning, I will try foresee what will come of it all," Mr. Antwine continued. "I venture to say that, whereas disarmament was never practicable, we shall have regulated armament very speedily now. The countries of Europe cannot go on impoverishing themselves in the mad race to keep up with one another's army and navy, and when the smoke of this war clears we shall find that something has been done about it. The victors will fix a limit for the losers, and to build battleships or maintain standing armies beyond that limit will mean another big scrap. That is a practicable solution of the problem, and it will strike everybody over there in good time. We will never see such navies and standing armies again as they have over there now, nor shall we be compelled to maintain any such navy again as we are maintaining now. One nation armed to the teeth kept all nations armed to the teeth. There could be but one result, and we are witnessing that now. After it is over we shall have regulatien in armament between nations just as we have it among individuals. That will be sense, and sense is what Europe is knocking into herself

It sounds good. But like all other roblems, worked out with mathematical precision, it does not reckor with the human equation, which, as it goes along, often finds the unknown quantity or quality which produces all sorts of improper fracions or rather infractions.

for example, if X marry Y in a perfectly good contract there often enters the Z party in the form of "friend" or corespondent, who certainly mixes the equation. There are many people who go into a marriage of money or CONVENIENCE, yet they rarely are satisfied with heir bargain.

All marriage, to succeed, must needs reckon with that which spells success in the realm of matrimony - namely, happiness.
Therefore the marriage contract is like no other. It can't be measred or weighed with any degree of certainty.

The marriage that lasts and make for the joy of living is the one that takes into consideration more than iving expenses or social aspirations r bank accounts.

Team Play a Myth. Making Trip Minus Pay MEMBERS of the Indianapo-MEMBERS of the Indianapolis (American Association) team are making their present road trip without being paid, according to a ball-player now in St. Louis. He claims that the Indianapolis Feds have outdrawn the Association team to such an extent that there was no money in the Indians' treasury at the end of the last at-home stand to pay the players. The athletes were told to make the trip, and that they would be paid as soon as money was taken in on the road.

All of which is important, if true. If so, it is the first time in the history of the game that a ballplayer has not been paid without making a squawk that could be heard from coast to coast.

Shift Helps Cards.

M ANAGER HUGGINS of the Cardinals has done considerable experimenting this season and his most recent shift seems to have been his best. The transfer of Lee Magee to first base has rounded out a much improved inner defense for the Cards, a team that looks vastly superior to the crippled outfit which lost 12 out of 20 games on the road.

The Cardinals are returning to the snappy form which made them the most troublesome entity in the League a month ago. One reason for that is that Coxy Dolan is back on the job in left field and he is showing his usual speed on the bases. Coxy hasn't hit a lick since he returned to the game, having a total of four safe alams out of 43 times at bat in 12 games. That isn't a very hefty average, but Coxy's record improves when one considers the fact that he has coaxed 10 passes and been beaned once. He has reached first base exactly 15 times in 12 games and hes managed to purloin five bases, boosting his total to 30, which is third high in the parent body.

Dolan a Real Base Thief. Shift Helps Cards.

### Dolan a Real Base Thief.

Cozy is a born base-runner and he's doing middlin' well as an outfielder. At least he's a much bigger factor in a ball game than Walton Cruise or Joe Riggert, who lack the experience and initiative to shine. In yesterday's game Cozy managed to score two runs, although he didn't get a hit. He coaxed two passes and pilfered his way around the bags in the eighth inning.

It may be aiming too high, but after watching the improved work of the club in two games against the Cubs and one against the Phillies, we are convinced that had the Cardinals escaped the injury finx which at times during the past month claimed Doian, Wisgo. Beek, Sailee, Doak and Huggins, the club would now be pacing the field.

None of the other leaders have met such luck. The Giants early in the season were without the services of Art Fletcher for two weeks, while Larry Doyle missed about six ball games. Aside from that, McGraw's team has been intact from the start. Boston hasn't had a mishap since it struck a winning streak, and for that reason the Braves have been going along awimmingly. The Cardinals, though, cracked for a time when deprived of several stars, but with these regulars back in the box score the club has rounded to and again is ready for a fight.

Hug's team is prepared to have its say in the final shaning of the pennant hunt, and anything worse than third place will surprise the sharps.

POST-DISPATCH RECORD OF MARKETS

ing loans.

"There are thus two very well-defined sides to the question of reopening. In judging between them it must be resume its business some time and that (unless in the quite inadmissible supposition of a three or six months' shutdown) there is no assurance that these ideals are then than now.

Orders: Exchange Market Easier. By Leased Wire From the New York Bureau of the Post-Dispatch. NEW YORK, Aug. 18.—The Evening Post, in its commished financial review

le neids, in the case of remany.

"A violent rise in wheat today was the plainest witness to what the trade expects; it reflected unmistakably the substantial increase in the export movement since this week began. Once this is under way we shall hear little more about the hundred millions of gold which London expects us to send to Ottawa. Prices Are Steady,

which London expects us to send to Ottawa. Prices Are Stendy.

"Prices on the irregular and unauthorized curb market for Stock Exchange securities have been so well maintained in the trading of recent days that today there was evidence of a shifting of business from the curb to the Stock Exchange Clearing House, in which latter spot the exchange officials themselves have authorized private trading, provided prices fixed are not below the closings of June 30. Such shifting was evidence that the outside market was in a laready ruling above that level—a fact which is of great importance, in its bearing on the question of reopening the Stock Exchange itself.

"That question is surrounded with some difficulties. It may be described as a case in which the responsible authorities hesitate to raise the lid through fear of what may be found beneath it. Yet, sooner or later, the action must be taken, and meantime not only wall street, but the legitimate investing community, is growing restive.

"There are two sides to the question. In favor of reopening, at the earliest feasible moment, is, first, the fact that holders of Stock Exchange securities, whose personal reasons for wishing to turn their holdings into cash may be urgent, have some plain rights in the matter. But quite aside from that, both the recent course of prices on the curb and the experience of other panics goes to show that the natural level of values at this time would not be much if at all below those quoted the day before the Stock Exchange closed down.

"To this the opponents of reopening—largely the banking interest—reply, first, that the curb market prices do not break, because the facilities of that market will not admit of extensive realizing sales for European account, whereas an officially reopened Stock Exchange would at once have to take such offerings.

No Precedent for Market.

"Second, it is answered, that the im-

There is a shade more hopeful sent ment in bank circles today, althoug some of the downtown institutions hav again advanced interest rates from again advanced interest rates from 8 to 7 per cent, where balances did not 7 per cent, where balances did not warrant borrowers in receiving the first-mentioned and lower quotation. Generally speaking, however, deposits are holding up very well, and one of the leading causes of a higher level of interest charges may be laid to the fact that prime commercial paper has taken anyother upshoot, and is now normally 7 per cent. Out-of-town banks are doing little or nothing in the way of buying paper, and some currency shipments have been reported to them in the past day or two. Otherwise there is no change in this respect.

Copper Dividend Passed.

NEW YORK, Aug. 18.—Directors of the Granby Consolidated Mining. Smelting and Power Co. Ltd., today announced their decision to defer payment of the regular quarteriv dividend of \$1.50. The company, which has large mining properties in British Columbia, had paid 6 per cent dividends since March, 1913. Chicago Market Shows Gain of Five Cents; Corn Also Strong.

CHICAGO, Aug. 18.—Wheat today opened %c to %e under yesterday, but advanced quickly on word from New York exporters that they could at last "see daylight" Bankers were said to be buying grain bills on contracts for shipments to England, and it was added that bankers were making a similar arrangement to estable shippers to France to dispose of their bills. While the volume of business was small, the upturn carried prices 2%c to 2%c over yesterday's close. carried prices 24c to 25c over yesterday's close.

Corn and oats also advanced, the former opening 3c to 3c higher and the latter 4c to 4c up. On early trades Sept oorn rose 13c over yesterday. The trade in corn was small, but in oats it was somewhat more liberal. London was reported buying oats in English markets for the army.

Sept. pork dropped an extreme 50 cents at the opening on a correction of the stocks on hand, showing that the statement of last Friday was about 5000 barrels too small. Lard and ribs were a few cents ether way of yesterday's close.

The export situation carried the advance in wheat to 5c over yesterday, and the close was 44c up.

The close in corn was strong 1%c over

WHEAT SCORES GAIN OF OF FIVE CENTS A BUSHE

Heavy Buying Movement Follows More Satis factory Export Conditions-Corn Also Makes Wide Advance.

TUESDAY'S COMPARATIVE FUTURE QUOTATIONS

MILLING NEWS Milling and Grain News says:

"Light rains have improved corn
east of the Mississippi River and
in sections of Missouri, but generally speaking the crop shows no
betterment, and the yield promises
only alightly heavier than the
drouth crop of last year. Spring
wheat is being harvested under
favorable weather conditions, and
the crop is about in line with recent
reduced, estimates. Farmers are
holding winter wheat and the movement to market is restricted on this
account. Much wheat also is being
fed to stock. The creat of the
movement to market from the
Southwest has been passed.

There was a further rise of 2 to 3 cures a bushel in local wheat prices Tuesday, following more satisfactory arrangements for opening our export markets to Europe. Trade was broader than in some time, and commission houses took the advancing side.

Corn futures also showed decided strength and rose nearly 2 cents a bushel, on continued dry weather and high temperatures over the growing belt. Foreign crop news was mostly favorable and Liverpool failed to enthuse over our advance. Broomhall's official Liverpool cable said:

"The opening of the wheat market was at a decline of 1/2 with expectations of further liberal arrivals and a better inquiry from France and Fortugal. Later the market developed some steadiness, with support in evidence and both October and December gained 4/2, with better bidding for cargoes and a firmer feeling in spot.

Corn opened unchanged and remained so during the early trading. Plate spot was weak and Argentine weather favorable, but the steady American cables offset these. Trading is quiet."

dom-Harvesting is making fair progress, with the weather splendid. High crop promise is maintained. "France—In the low countries the weather is very fine, and it is believed that harvest results are making fair progress. "Germany-Many advices are received here that harvesting is finished. "India—Crop outlook less favorable. Efforts are being made by leading merchants looking to the resumption of business." The European wheat visible this

tra and Mrs. Stryver asked both Mrs. Jarr and Mrs. she will live for now is to win cups at dancing contests! No more beauty treatment or anything else but cupping for her!"

"And I heard Mr. Stryver say him-if that he disliked Mr. Dinkston in-

ell," Mr. Jary had said finally.

"Well," Mr. Jarr had said finally.
"If Dinkston doesn't go both Mr. Smith and I won't. You forget that Michael angelo Dinkston is one of the best dancers in the country. As The "reat Plantagenet he could make a fortune, only he doesn't want a fortune."
"I never thought of that." said Mrs. Jerr. "Why, he was Clara Mudridge-smith's first instructor!"

Mr. Dinkston appeared upon the scene attired, as Mrs. Mudridge-Smith afterward described it, a la dernier ord, especially as regards his dainty old gold shirt studs with cuff buttons of the same size and style. These last had all the dancing chappies wild with every. The ladies all admitted Mr. Dinkston was a welcome addition to the farty, especially as Mr. Smith couldn't tango a step without his dancing crutches, while Mr. Stryver didn't dance because, as he said, how can you sell bonds to people by dancing with them?

As for Mr. Jarr, he was always just grasping the idea of a step that everybedy had stopped dancing the week before!

So, thanks to the presence of Mr.
